WP-2

Key Features and Benefits

- Switchable dual channel wall plate for analog partyline intercom systems
- Dual channel wiring to a selector switch for a connection to a single channel intercom station
- Operator can choose channel used
- (1) 3-pin Male XLR type connector
- Standard single gang size
- Passive device

Encore™ is a 2-wire analog partyline system with intuitive plug-and-play design and superior “Clear-Com Sound” audio clarity.

Description

The WP-2 is a passive wall plate that allows an easy and effortless connection of a single channel intercom station to an installed cabling infrastructure. Two channels can be wired to the WP-2 wall plate and a two-channel selector switch is provided for the user to select which intercom channel will be provided to the connected intercom station.

The WP-2 is flush mounted to a single gang recessed backbox (not included) with soldered internal connections.
