1 Introduction

1.1 Scope

This document describes all releases of Agent-IC Virtual Client of major version 2.8+ for Android devices.

1.2 Agent-IC Android Version 2.9-build.383

Sustaining release of the Agent-IC Virtual Client for Android operating systems capable of connecting to either Eclipse HX 8.5+ with available IVC-32 or E-IPA capacity or LQ v4.0+ over 3G, 4G, LTE and WiFi networks.

1.2.1 Features added in this release

None.

1.2.2 Enhancements in this release

None.

1.2.3 Bug Fixes in this release

	<p>Support for older Eclipse HX versions Agent-IC could not reliably connect to versions older than 12. This has been fixed.</p>
--	---

Please note:

As the previous release, Version 2.8-build.343, had a limited roll out it is recommended to familiarize yourselves to those release notes as well.

1.2.4 Part Number Reference

1.2.4.1 Firmware

Part No	Description	File Type	Production Rev	Dev Issue	Last updated in Release
SOF-00177	Agent-IC Software for Android	APK	2.9.-build.383	C	2.9.-build.383

1.2.4.2 Documentation

Part No	Description	Production Rev	Doc Issue	Last updated in Release
PUB-0020300203	Agent-IC Android Release Notes	C	C	2.9.-build.383
PUB-00204	Agent-IC User Guide	C	2.2	2.9.-build.383

Agent-IC Android v2.9-build.383 Release Note

1.3 Agent-IC Android Version 2.8-build.343

Sustaining release of the Agent-IC Virtual Client for Android operating systems capable of connecting to either Eclipse HX 8.5+ with available IVC-32 or E-IPA capacity or LQ v4.0+ over 3G, 4G, LTE and WiFi networks.

1.3.1 Features added in this release

None.

1.3.2 Enhancements in this release

	Manual: Embedded user manual was updated as a part of this release.
--	---

1.3.3 Bug Fixes in this release

128300	Corruption of Connection Parameters: In rare instances, it was noticed that intercom system connection parameters could become corrupt and require the user to delete the app data and re-enter. This has been fixed.
128347	Bluetooth Audio Stopped working: Upon update user reported Bluetooth Audio only working in one direction. This has been fixed.
131659	Cloud Profiles: Issues were found with the synchronization of data to/from Cloud Connection Profiles, icons and profile images. This has been fixed.

Please note:

As the previous release, Version 2.8-build.319, had a limited roll out it is recommended to familiarize yourselves to those release notes as well.

1.3.4 Part Number Reference

1.3.4.1 Firmware

Part No	Description	File Type	Production Rev	Dev Issue	Last updated in Release
SOF-00177	Agent-IC Software for Android	APK	2.8.-build.343	A	2.8.-build.343

1.4 Agent-IC Android Version 2.8-build.319

Minor feature release of the Agent-IC Virtual Client for Android operating systems capable of connecting to either Eclipse HX 8.5+ with available IVC-32 or E-IPA capacity or LQ v4.0+ over 3G, 4G, LTE and WiFi networks.

1.4.1 Features added in this release

H199 H282	<p>Cloud Profiles: Station-IC (version 1.2) and Agent-IC (iOS version 2.10, Android version 2.8) Virtual Clients now have the ability to store intercom system connection Profiles to a Clear-Com Cloud Storage. This allows a Virtual Client user to enter the Profile settings, including the IP address of the intercom system, port number, user name and password, amongst other settings, and have them stored in a Clear-Com Cloud Storage, protected by the users Google, Microsoft, Apple, E-mail or SSO/SAML* credentials and make them easily accessible between the users devices or on a device that is used by many users, who need different settings.</p> <p>Note: This feature shares the Virtual Client Profile and settings between Clients only. Profile settings such as user names and passwords must still be established in the EHX/LQ CCM and manually entered into the Station-IC and Agent-IC Virtual Client.</p> <p>* Use of SSO/SAML is only available for Station-IC (<u>not available for Agent-IC</u>) and requires a chargeable Clear-Com Service for setup and a unique code each client user must add to their Station-IC setup. Contact Clear-Com for further information and quote.</p>
--------------	--

1.4.2 Enhancements in this release

	<p>Manual: Embedded user manual was updated as a part of this release.</p>
--	---

1.4.3 Bug Fixes in this release

None

1.4.4 Part Number Reference

1.4.4.1 Firmware

2 Known Issues

This section details those issues that contradict the relevant manuals included in this release. These issues have not been resolved and are listed here to help you use the system more effectively.

	Hardware Compatibility: Hardware and capabilities of devices running Android OS varies widely between manufacturers, devices and vintages. While much effort is spent testing on a wide variety of commonly available Android devices users are requested to validate their specific device by downloading Agent-IC from the Google Play store and connect to the Clear-Com demo system.
132762	Android Wear Compatibility With a recent update to underlying Android services, some wearOS devices will not be able to run the Agent-IC wearOS companion application.
134096	Profile Quick access: On devices with 3D touch technology on deep press on Agent-IC main icon and selecting quick access to a profile application will crash
